CLOUD-BASED SOFTWARE

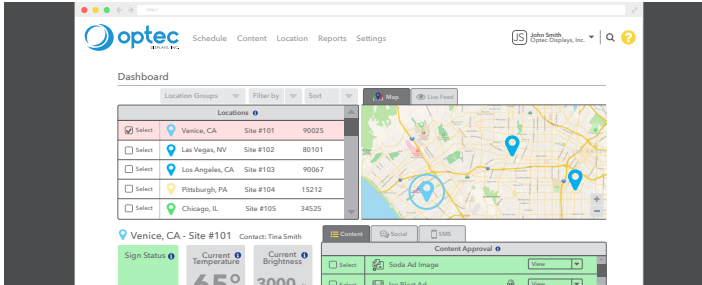

<p>LOCATION MANAGEMENT</p> <p>Create, edit, and view each display location. View display schedules, campaigns, and status.</p>	<p>LOCATION GROUPING</p> <p>Organize display locations for easier identification and to expedite scheduling.</p>	<p>CONTENT MANAGEMENT</p> <p>Upload content for one or multiple display sizes and content types. Require approval before use.</p>	<p>SMART FOLDERS</p> <p>Assign content to Smart Folders limiting use to location, date, and time.</p>	<p>ADVANCED SCHEDULING</p> <p>Schedule down to the minute for one or multiple displays.</p>
<p>QUICK MESSAGE</p> <p>Schedule content to one or multiple locations in four quick steps.</p>	<p>CAMPAIGN SCHEDULING</p> <p>Schedule or create campaign templates built around 24 hour or day part play back.</p>	<p>ORGANIZATION MANAGEMENT</p> <p>Create a single organization or manage multiple organizations from one account.</p>	<p>USERS AND USER ROLES</p> <p>Create and manage users and user roles. Create access levels and require approval for actions.</p>	<p>SECURE CONNECTION</p> <p>SSL technology is used to establish an encrypted link between web browser and server.</p>

DNET 3.0

CLOUD-BASED SOFTWARE

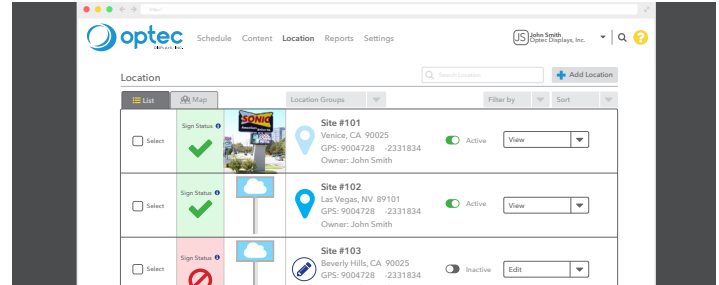

DNET 3.0 is a cloud-based software allowing access to users on-demand, via Internet access, to manage a network of displays. Using a web browser on a computer, mobile phone, or tablet to network, schedule, manage content quickly and effectively from anywhere.

*Internet access required.

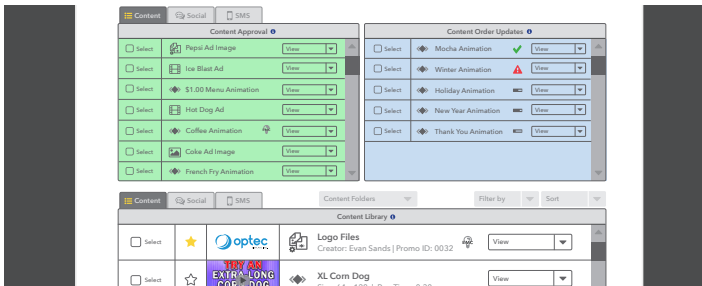

DASHBOARD VIEW

Get an instant overview of your display network. Select a location to find see it on the map, review sign status, and see if content is scheduled. Content requiring your approval will be shown as well.

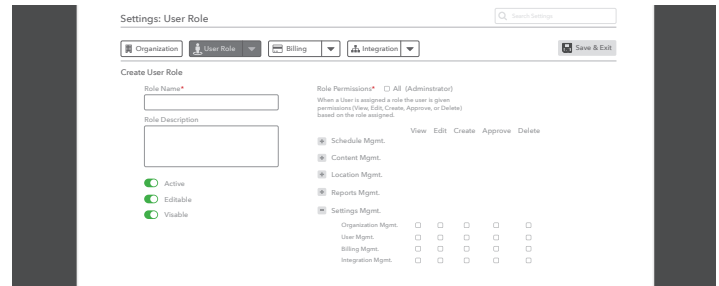

LOCATION MANAGER

Create and manage display locations. Group locations, color code for easy reference, or view locations on a map. Setup display locations prior to physical installation and be ready to send content as soon as it goes live.

CONTENT MANAGER

Easily manage your content library. Upload one or multiple media types for each display size and zoning requirement needed. DNET will schedule the required file for each location selected.

USERS AND USER ROLES

Create and manage users and user roles. Allow a user permission to all or certain functions. Build user functionality, focus tasks, and limit information based on your corporate structure.

Display Requirements

Required Connectivity	Internet Access
Minimum System/Device Requirements	
Required Processor	1GHZ Processor or Faster
Required Memory	1GB RAM
Required Hard Disk Space	Up to 2GB Available
Required Video Card	Intel® HD Graphics 520 or Better
Required Connectivity	Internet Access

Software Information

Version	3.0
Browser Compatibility	Chrome, Firefox, Safari
Browser/Server Security	SSL
Password Protection	10 Character Minimum
Languages	English
Rating	4+
